Site-library of the most popular films during the last 24 hours according to TMDB. Teamwork of our group. My role in the team: Developer. The functionality of the site allows you to display on the main page of the most popular films, there is also a search for films by keyword. The function of adding (deleting) your favorite films to your personal library is available. Mobile First technology was applied, adaptive-responsive layout for all standard devices.

4. Phone Book **Link, GitHub** [React , Axios , Formik]

Application "phone book", for storing phone numbers. To use the application pre-registration is required. It is available: registration, authorization, adding and deleting contacts, as well as searching by keywords.
