

# Sergey Petukhov

## Front-End Developer

I, a Junior Front-End developer, am looking for a permanent job in a company with like-minded people, which are constantly developing and improving themselves. I know HTML, CSS/SASS, JavaScript, React. Have experience of working in a team. Features of my character: development, practice and work for the result.

## Project experience

1. Resume ..... [HTML5, CSS3]  
A simple trilingual website for my resume, based on HTML and CSS/SASS.
2. Web Studio ..... [HTML5, CSS3]  
Web Studio. Two-page site of medium complexity. Designed according to the layout in Figma editor, based on HTML, CSS/SASS. Used Mobile First technology, adaptive-responsive layout for all standard devices.
3. Ice Cream ..... [HTML5, CSS3, JavaScript]  
Site for the sale of ice cream. Teamwork of our group. My role in the team: Developer. The site was designed according to the online layout of the Figma editor, based on HTML, CSS / SASS and JavaScript. Used Mobile First technology, adaptive-responsive layout for all standard devices. The CSS animation library was also used.
4. Film Library ..... [HTML5, CSS3, JavaScript]  
Site-library of the most popular films during the last 24 hours according to the Figma editor. Teamwork of our group. My role in the team: Developer. The functionality of the site allows you to display on the main page of the most popular films, there is a search for films by keyword. The function of adding (deleting) your favorite films to your personal library is available. Mobile First technology was applied, responsive layout for all standard devices.
5. Phone Book ..... [React, Axios, Formik]  
Application "phone book", for storing phone numbers. To use the application, registration is required. It is available: registration, authorization, adding and deleting contacts, as well as searching by keywords.
